

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A method of operating a mobile terminal comprising the steps of:
 - (a) receiving a first component of a document over a first communication channel;
 - (b) receiving a second component of the document over a second communication channel; and
 - (c) combining the first and second components of the document at the mobile terminal.
2. (Original) The method as recited in claim 1, wherein:
 - (a) the first communication channel comprises a first bandwidth; and
 - (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.
3. (Withdrawn) The method as recited in claim 1, wherein:
 - (a) the first communication channel having a first connection cost; and
 - (b) the second communication channel having a second connection cost less than the first connection cost.
4. (Withdrawn) The method as recited in claim 1, wherein:
 - (a) the first communication channel comprises a wireless communication channel; and
 - (b) the second communication channel comprises a wired communication channel.

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

5. (Withdrawn) The method as recited in claim 1, wherein:
 - (a) the first communication channel comprises a connection to the Internet;
and
 - (b) the second communication channel comprises a connection to a target computer.
6. (Withdrawn) The method as recited in claim 1, wherein:
 - (a) the first component of the document comprises a body of an email; and
 - (b) the second component of the document comprises an attachment to the email.
7. (Withdrawn) The method as recited in claim 1, wherein:
 - (a) the first component of the document comprises a text of a web page; and
 - (b) the second component of the document comprises images of a web page.
8. (Withdrawn) The method as recited in claim 1, wherein:
 - (a) the first component of the document comprises a text of a word processing document; and
 - (b) the second component of the document comprises images of the word processing document.
9. (Withdrawn) The method as recited in claim 1, wherein:
 - (a) the first component of the document is received during a remote synchronization session; and
 - (b) the second component of the document is received during a local synchronization session.
10. (Original) The method as recited in claim 1, wherein the first component of the document is received over the first communication channel substantially concurrent with

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

receiving the second component of the document over the second communication channel.

11. (Original) The method as recited in claim 1, wherein:
 - (a) the first component of the document is received during a first synchronization session; and
 - (b) the second component of the document is received during a second synchronization session.
12. (Original) A method of operating a mobile terminal comprising the steps of:
 - (a) receiving a first component of a document over a communication channel during a first synchronization session;
 - (b) receiving a second component of the document over the communication channel during a second synchronization session; and
 - (c) combining the first and second components of the document at the mobile terminal.
13. (Original) The method as recited in claim 12, wherein
 - (a) the first component of the document is received over a first communication channel; and
 - (b) the second component of the document is received over a second communication channel.
14. (Original) The method as recited in claim 13, wherein:
 - (a) the first communication channel comprises a first bandwidth; and
 - (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.
15. (Withdrawn) The method as recited in claim 13, wherein:
 - (a) the first communication channel having a first connection cost; and

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

(b) the second communication channel having a second connection cost less than the first connection cost.

16. (Withdrawn) The method as recited in claim 13, wherein:

(a) the first communication channel comprises a wireless communication channel; and

(b) the second communication channel comprises a wired communication channel.

17. (Withdrawn) The method as recited in claim 13, wherein:

(a) the first communication channel comprises a connection to the Internet; and

(b) the second communication channel comprises a connection to a target computer.

18. (Withdrawn) The method as recited in claim 12, wherein:

(a) the first component of the document comprises a body of an email; and

(b) the second component of the document comprises an attachment to the email.

19. (Withdrawn) The method as recited in claim 12, wherein:

(a) the first component of the document comprises a text of a web page; and

(b) the second component of the document comprises images of a web page.

20. (Withdrawn) The method as recited in claim 12, wherein:

(a) the first component of the document comprises a text of a word processing document; and

(b) the second component of the document comprises images of the word processing document.

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

21. (Withdrawn) The method as recited in claim 12, wherein:
- (a) the first synchronization session comprises a remote synchronization session; and
 - (b) the second synchronization session comprises a local synchronization session.
22. (Original) A mobile terminal comprising:
- (a) a screen;
 - (b) a local memory; and
 - (c) a terminal controller for:
 - receiving a first component of a document over a first communication channel;
 - receiving a second component of the document over a second communication channel; and
 - combining the first and second components of the document at the mobile terminal.
23. (Original) The mobile terminal as recited in claim 22, wherein:
- (a) the first communication channel comprises a first bandwidth; and
 - (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.
24. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first communication channel having a first connection cost; and
 - (b) the second communication channel having a second connection cost less than the first connection cost.
25. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first communication channel comprises a wireless communication channel; and

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

- (b) the second communication channel comprises a wired communication channel.
26. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first communication channel comprises a connection to the Internet; and
 - (b) the second communication channel comprises a connection to a target computer.
27. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document comprises a body of an email; and
 - (b) the second component of the document comprises an attachment to the email.
28. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document comprises a text of a web page; and
 - (b) the second component of the document comprises images of a web page.
29. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document comprises a text of a word processing document; and
 - (b) the second component of the document comprises images of the word processing document.
30. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document is received during a remote synchronization session; and
 - (b) the second component of the document is received during a local synchronization session.

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

31. (Original) The mobile terminal as recited in claim 22, wherein the first component of the document is received over the first communication channel substantially concurrent with receiving the second component of the document over the second communication channel.

32. (Original) The mobile terminal as recited in claim 22, wherein:
(a) the first component of the document is received during a first synchronization session; and
(b) the second component of the document is received during a second synchronization session.

33. (Original) A mobile terminal comprising:
(a) a screen;
(b) a local memory; and
(c) a terminal controller for:
receiving a first component of a document over a communication channel during a first synchronization session;
receiving a second component of the document over the communication channel during a second synchronization session; and
combining the first and second components of the document at the mobile terminal.

34. (Original) The mobile terminal as recited in claim 33, wherein
(a) the first component of the document is received over a first communication channel; and
(b) the second component of the document is received over a second communication channel.

35. (Original) The mobile terminal as recited in claim 34, wherein:
(a) the first communication channel comprises a first bandwidth; and

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

- (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.
36. (Withdrawn) The mobile terminal as recited in claim 34, wherein:
- (a) the first communication channel having a first connection cost; and
 - (b) the second communication channel having a second connection cost less than the first connection cost.
37. (Withdrawn) The mobile terminal as recited in claim 34, wherein:
- (a) the first communication channel comprises a wireless communication channel; and
 - (b) the second communication channel comprises a wired communication channel.
38. (Withdrawn) The mobile terminal as recited in claim 34, wherein:
- (a) the first communication channel comprises a connection to the Internet; and
 - (b) the second communication channel comprises a connection to a target computer.
39. (Withdrawn) The mobile terminal as recited in claim 33, wherein:
- (a) the first component of the document comprises a body of an email; and
 - (b) the second component of the document comprises an attachment to the email.
40. (Withdrawn) The mobile terminal as recited in claim 33, wherein:
- (a) the first component of the document comprises a text of a web page; and
 - (b) the second component of the document comprises images of a web page.
41. (Withdrawn) The mobile terminal as recited in claim 33, wherein:

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

- (a) the first component of the document comprises a text of a word processing document; and
 - (b) the second component of the document comprises images of the word processing document.
42. (Withdrawn) The mobile terminal as recited in claim 33, wherein:
- (a) the first synchronization session comprises a remote synchronization session; and
 - (b) the second synchronization session comprises a local synchronization session.
43. (Original) A computer program embodied on a computer readable storage medium for use in a mobile terminal, the computer program comprising code segments for:
- (a) receiving a first component of a document over a first communication channel;
 - (b) receiving a second component of the document over a second communication channel; and
 - (c) combining the first and second components of the document at the mobile terminal.
44. (Original) The computer program as recited in claim 43, wherein:
- (a) the first communication channel comprises a first bandwidth; and
 - (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.
45. (Withdrawn) The computer program as recited in claim 43, wherein:
- (a) the first communication channel having a first connection cost; and
 - (b) the second communication channel having a second connection cost less than the first connection cost.

Art Unit 2151

46. (Withdrawn) The computer program as recited in claim 43, wherein:
- (a) the first communication channel comprises a wireless communication channel; and
 - (b) the second communication channel comprises a wired communication channel.
47. (Withdrawn) The computer program as recited in claim 43, wherein:
- (a) the first communication channel comprises a connection to the Internet; and
 - (b) the second communication channel comprises a connection to a target computer.
48. (Withdrawn) The computer program as recited in claim 43, wherein:
- (a) the first component of the document comprises a body of an email; and
 - (b) the second component of the document comprises an attachment to the email.
49. (Withdrawn) The computer program as recited in claim 43, wherein:
- (a) the first component of the document comprises a text of a web page; and
 - (b) the second component of the document comprises images of a web page.
50. (Withdrawn) The computer program as recited in claim 43, wherein:
- (a) the first component of the document comprises a text of a word processing document; and
 - (b) the second component of the document comprises images of the word processing document.
51. (Withdrawn) The computer program as recited in claim 43, wherein:

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

- (a) the first component of the document is received during a remote synchronization session; and
- (b) the second component of the document is received during a local synchronization session.

52. (Original) The computer program as recited in claim 43, wherein the first component of the document is received over the first communication channel substantially concurrent with receiving the second component of the document over the second communication channel.

53. (Original) The computer program as recited in claim 43, wherein:
- (a) the first component of the document is received during a first synchronization session; and
 - (b) the second component of the document is received during a second synchronization session.

54. (Original) A computer program embodied on a computer readable storage medium for use in a mobile terminal, the computer program comprising code segments for:

- (a) receiving a first component of a document over a communication channel during a first synchronization session;
- (b) receiving a second component of the document over the communication channel during a second synchronization session; and
- (c) combining the first and second components of the document at the mobile terminal.

55. (Original) The computer program as recited in claim 54, wherein
- (a) the first component of the document is received over a first communication channel; and

Art Unit 2151
Serial No. 09/918,666

Reply to Office Action of 04/28/2005
Attorney Docket No.: K35A0872

(b) the second component of the document is received over a second communication channel.

56. (Original) The computer program as recited in claim 55, wherein:

- (a) the first communication channel comprises a first bandwidth; and
- (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.

57. (Withdrawn) The computer program as recited in claim 55, wherein:

- (a) the first communication channel having a first connection cost; and
- (b) the second communication channel having a second connection cost less than the first connection cost.

58. (Withdrawn) The computer program as recited in claim 55, wherein:

- (a) the first communication channel comprises a wireless communication channel; and
- (b) the second communication channel comprises a wired communication channel.

59. (Withdrawn) The computer program as recited in claim 55, wherein:

- (a) the first communication channel comprises a connection to the Internet; and
- (b) the second communication channel comprises a connection to a target computer.

60. (Withdrawn) The computer program as recited in claim 54, wherein:

- (a) the first component of the document comprises a body of an email; and
- (b) the second component of the document comprises an attachment to the email.

Art Unit 2151
Serial No. 09/918,666
